

TECHNICAL INFORMATION

Retail reference :

- Code : AGE1/DCREAM50
- 50 ml / 1.6 fl.oz
- Jar + outer box
- PAO : 12M

Professional reference :

- Code : AGE1/DCREAM150
- 150 ml / 5 fl.oz
- Airless bottle
- PAO : 12M

AGE DEFENSE LINE

The Age Defense Line is entirely dedicated to the beauty and health of the skin. Specifically formulated to give a smooth, firm and supple skin to women, the anti-aging skincare focus their action on cutaneous aging signs. Thus, thanks to the Hyaluronic Acid properties and a marin active particularly selected for its anti-aging activity, the skin is nourished, softened, energized and reveals its glow and natural beauty again.

ANTI-AGING DAY CARE

MATURE SKIN

- Helps maintain cutaneous hydration*
- Stimulates collagen synthesis
- Reduces the appearance of wrinkles and fine lines

NO ALLERGEN

Thanks to its exclusive Hyaluronic Acid complex and its specific marin active, this Anti-Aging Day Care dynamizes the Collagen synthesis and contributes to maintaining cutaneous hydration*. It fights efficiently against the signs of skin aging while providing an intense and lasting sensation of comfort, leaving the skin more supple, soft and subtly fragranced.

DIRECTIONS FOR USE

Morning and/or evening, apply the Anti-Aging Day Care onto clean and dry skin (face and neck) with light circular motions, until the complete absorption of the product.
For better results, apply the Anti-Aging Day Care after the Anti-Aging Concentrate.

* Upper layers of the epidermis

ACTIVE PRINCIPLES	%	CLAIMS
-------------------	---	--------

HYALURONIC ACID COMPLEX	25,00 %	<p>It is one of the chief components of the extracellular matrix. It contributes significantly to cell proliferation and migration, and locks moisture into the extracellular matrix, keeping collagen and elastin moist and promoting a youthful appearance.</p> <p>Literally acting like a sponge in the skin, the sodium hyaluronate can reach a level of water mobilization of up to 20 times its own weight. So it allows maintaining the cutaneous moisturization*, the water loss being the early symptom of the cutaneous ageing.</p> <p>Hyaluronic acid is also a major component of skin, where it is involved in tissue repair. When skin is excessively exposed to UVB rays, it becomes inflamed (sunburn) and the cells in the dermis stop producing as much hyaluronan, and increase the rate of its degradation. In this formula, several hyaluronic acids with different molecular weight (HW, MW and LW) have been used in order to obtain an optimal and complete efficacy :</p>
--------------------------------	----------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Sodium Hyaluronate	Molecular weight range (in Da)	Applications
HW	2 200 000 1 800 000	Anti-dehydration*, film forming & tensing effect
MW	1 800 000 1 000 000	Tensing effect, long-lasting hydration*
LW	1 000 000 400 000	Fastrack hydration*

MARIN ACTIVE <i>Pelvetia Canaliculata Extract</i> <i>Efficacy tests available</i>	1,00 %	<p>Petite algue brune originaire de la cote nord bretonne, Pelvetia contient des facteurs de croissance isoflavones et fucose. Elle possède une activité anti-âge par :</p> <ul style="list-style-type: none"> - stimulation de la synthèse des protéoglycanes (composants essentiels de la matrice extra-cellulaire, ils sont de véritables « pièges à eau ») - stimulation de la synthèse de collagène (protéine la plus abondante de l'organisme dont le renouvellement diminue au fil du temps ce qui provoque perte de fermeté et d'éclat) - réduction de la lipopéroxydation (action destructrice des radicaux libres sur les membranes cellulaires ce qui accentue donc le vieillissement cutané) - Réduction de l'activité de la stromélysine (responsable de la dégradation de l'élastine) <p>Des tests d'efficacité montrent que cet actif réduit de façon significative le nombre de rides et la surface totale de celles-ci.</p>
------------------------------------------------------------------------------------------------	---------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

INGREDIENTS

WATER (AQUA), CYCLOPENTASILOXANE, GLYCERIN, CAPRYLIC/CAPRIC TRIGLYCERIDE, CETEARYL ETHYLHEXANOATE, DIMETHICONE, HELIANTHUS ANNUUS (SUNFLOWER) SEED OIL, LAURYL LAURATE, METHYL METHACRYLATE CROSSPOLYMER, CETEARYL ALCOHOL, BEHENETH-25, HYDROGENATED POLYISOBUTENE, PROPYLENE GLYCOL, VITIS VINIFERA (GRAPE) SEED OIL, POLYSILICONE-11, SODIUM HYALURONATE, COCO-GLUCOSIDE, DIMETHICONE CROSSPOLYMER, PELVETIA CANALICULATA EXTRACT, SILICA, CARBOMER, TOCOPHERYL ACETATE, TRIETHANOLAMINE, FRAGRANCE (PARFUM), DIPROPYLENE GLYCOL, DECYLENE GLYCOL, CYCLOTETRAILOXANE, METHYLISOTHIAZOLINONE, SODIUM CHLORIDE, DC RED 33 (CI 17200).
